

The Sustainable Toolbox

Speed up
the sustainable transition
in your business

The Problem:

More and more, having a competitive lead means sustainable development.

We have to - and want to - begin the sustainable transition.

Although we know it's urgent, sustainable development can seem unmanageable for (SMEs) Small and Medium-Sized Enterprises.

Problem - step 1:

It's enterprises, not politicians or individuals, that make a difference in the sustainable transition. However, SMEs often have great difficulty getting started.

Problem - step 2:

90% of Europe's businesses are SMEs which have difficulty overseeing sustainable transition – which seriously slows down the climate-friendly development.

Problem - step 3:

SMEs often don't have the means to involve paid consultants to begin the process of transition. Therefore, this role can, to everyone's advantage, be carried out by the enterprise's own employees using our teaching and training.

Solution - step 1:

It is up to the management to begin the sustainable transition, implementing it together with all employees, and backed up by our super-professional team.

Solution - step 2:

All companies will find their own optimal sustainable transition, which benefits their bottom line.
Let's get started!

Solution - step 3:

Through us and our experienced practitioners, your company will receive expert knowledge, step-by-step lessons and training, and practical tools. .

Online seminar to a sustainable transition

We train you to apply practical tools for a sustainable transition in your company or organisation.

The entire course can be worked through in your enterprise in four months by using three hours a week on it.

The seminar involves the following subjects:

Seminar lessons and training:

1) Circular Economy

2) Experiences from a sustainable business

3) Involvement of employees

4) Sustainability goals in practise

5) Communication and Sales

6) Optimisation of supply chain

7) Long-term planning, product development, and certification

8) Networking and crisis management

Why now?

Because soon it will be too late!

And because:

- Investors prefer to support green enterprises**
- Customers demand sustainable products and services**

So, companies must embark on a sustainable journey – especially if you want to be ahead of your competitors

Why us ...
and not another
company ??

Advantage 1

We are specialists in our branches – handpicked with lots of experience from SMEs that are in the process of becoming sustainable

Advantage 2

The psychological approach:
- we create bridges between expertise and use of practical tools

Advantage 3

Online = always available
